Art Unit: 2141

1. Claims 1-24 are presented for examination.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 5, 7-10, 12, 14-18, 20, and 22-24 are rejected under 35 U.S.C. § 103 (a) as being unpatentable over Gu et al. (Gu) patent no. 6,744,780, in view of Chu et al. (Chu) patent no. 6,718,376.

4. As to claim 1, Gu teaches the invention substantially as claimed, including a method of managing a system, comprising:

determining a period for sending management information requests to the system (col. 3 lines 14-24, initial polling interval of network element 20);

sending a management information request to the system in accordance with the determined period (col. 2 lines 29-42; col. 3 lines 14-24); and

performing management of the system based on a response received from the system, wherein the period for sending the management information request is determined based on an operating status of the system (col. 3 lines 26-40; adjust the initial polling to a subsequent polling interval).

However, Gu does not explicitly teach management information comprises operational history.

Chu teaches accessing performance history of each interface and service over a specified period of time (col. 1 line 62 - col. 2 line 14; col. 6 lines 5-28).

It would have been obvious to one of ordinary skill in the Data Processing art at the time of the invention to combine the teachings of Gu and Chu to allow requesting operational history because it would provide administrator capability to predict future performance.

5. As to claim 2, Gu teaches a period for sending management information requests includes time-decaying the period if the operating status of the system is determined to be normal (col. 8 lines 15-61).

6. As to claims 3 and 5, Gu teaches determining a period for sending management information requests includes increasing the period by a decay amount if the operating status of the system is determined to be normal wherein the decay amount is variable (col. 8 lines 15 - col. 9 line 63).

7. As to claim 7, Gu teaches the operating status of the system is determined based on a value of a predicate function (col. 3 lines 26-40).

8. As to claim 8, Gu the steps of determining, sending and performing are performed by a specialized management thin server or server appliance (col. 1 line 29-42).

9. Claims 9-10, 12, 14-18, 20, and 22-24 have similar limitations as claims 1-3, 5, 7-8; therefore, they are rejected under the same rationale.

10. Applicant's arguments with respect to claims 1-3, 5, 7-10, 12, 14-18, 20, and 22-24 have been considered but are deemed to be moot in view of the new grounds of rejection.

11. Office personnel are to give claims their broadest reasonable interpretation in light of the supporting disclosure. In re Morris, 127 F.3d 1048, 1054-55, 44 USPQ2d 1023, 1027-28 (Fed. Cir. 1997). Limitations appearing in the specification but not recited in the claim are not read into the claim. In re Prater, 415 F.2d 1393, 1404-05, 162 USPQ 541, 550-551 (CCPA 1969). See also In re Zletz, 893 F.2d 319, 321-22, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989) ("During patent examination the pending claims must be interpreted as broadly as their terms reasonably allow.... The reason is simply that during patent prosecution when claims can be amended, ambiguities should be recognized, scope and breadth of language explored, and clarification imposed.... An essential purpose of patent examination is to fashion claims that are precise, clear, correct, and unambiguous. Only in this way can uncertainties of claim scope be removed, as much as possible, during the administrative process."). Therefore,

Art Unit: 2141

limitations that are argued by applicant but are not in claimed language are not being considered by Examiner.

12. Applicant's amendment necessitated the new grounds of rejection. Accordingly, THIS ACTION IS MADE FINAL. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
